As part of our program your children will work on functional physical dance technique based on contemporary knowledge of developmental patterns and anatomical

principles of movement. Through physical technique, children develop motor skills, coordination and flexibility. They will be introduced to the basics of rhythmics (basic rhythmic figures and forms) and will develop musicality. Also, as part of our program, we place great emphasis on creative movement and dance, guided improvisations and encourage creativity and individuality of movement in each child. In addition, children will be introduced to basic dance vocabulary and ballet exercises on the spot and through the space. During the school year, children also have an organized public performance on the theatre stage at the annual production of PS Lepeza, which takes form of a play every year and where each group has an opportunity to perform with their chosen choreography.

Dance teacher is Tena Grabner Džaja, dance pedagogue with many years of teaching experience.
